*Open to new roles · Remote preferred, open to on-site in Vietnam*

## SUMMARY

Senior mobile engineer with 10+ years building native and cross-platform apps for fintech, banking and healthcare, with a desktop background on macOS and Windows. Developed four native iOS and Android apps in a 20-engineer team, led technical design and small teams, and mentors engineers. Also building with AI coding tools (Claude Code, GitHub Copilot, Speckit) for the past year, with written specs and tests.

**Core skills:** Swift, SwiftUI, Kotlin, Java, Flutter, Dart, MVVM, Clean Architecture, C#, .NET Core

## EXPERIENCE

### Senior Software Engineer · KMS Technology — 11/2018 – 09/2026

*Ho Chi Minh City. Client projects in banking, fintech, healthcare and research; client names withheld.*

**Project-management tool** — 06/2026 – 09/2026
Team of 8 · React, PostgreSQL
Wrote the technical design for planning poker and retrospective features. Implemented UI, features, workflows and unit tests for backend and frontend with AI coding tools (Claude Code, Speckit).

**Healthcare mobile app proposal** — 05/2026 – 06/2026
Team of 5 · iOS, Android, Kotlin
Used AI coding tools to implement UI, workflows and unit tests for a proposed integration with a clinical dosing service.

**Healthcare Android app support** — 09/2025 – 05/2026
Team of 2 · Android, Java, Kotlin, AWS
Kept a legacy Android app healthy in production by diagnosing production bugs and proposing fixes.

**Digital banking app** — 06/2025 – 08/2025
Team of 6 · Flutter, Swift, Kotlin, Java
Maintained and fixed bugs in a Flutter lending module embedded in the native iOS and Android apps, and built features in the new single-codebase Flutter app.

**Donation platform (fintech)** — 08/2023 – 06/2025
Team of 20 · Swift, SwiftUI, Kotlin, Java
Developed four native apps, two for iOS and two for Android, supporting one-time and recurring donations with dedication messages.

**Generative AI research** — 03/2023 – 04/2023
Team of 13
Evaluated the pros and cons of ChatGPT for cross-skilling from macOS to iOS, built two iOS demo apps and presented the findings.

**Research analysis software (desktop and cloud)** — 11/2018 – 03/2023
10 to 30 engineers · Developer, then Team Lead from 06/2021

- Designed the module architecture and framework, and the detailed component designs, for macOS (Swift, Objective-C, C++), Windows (C#, WPF) and cloud (.NET Core, React).
- Turned business rules written as use cases into design models that fit the client's existing products.
- Led a team of 2 to 3: trained members, kept the project plan and development artifacts current, and coached engineers on performance.

### Software Engineer, then Senior Software Engineer · Global Cybersoft 11/2015 – 11/2018

*Ho Chi Minh City. Factory-automation software for semiconductor manufacturing.*

- Team Lead of a four-engineer material-control project and Sub-team Lead of a five-engineer equipment-interaction project; ran scrum, estimated sprints and worked directly with customers.
- Designed a data-editor framework for configuration and recipe editors, built on a plug-in architecture (WPF, WCF, MVVM, Prism, Caliburn).
- Developed components in C and C++ (Linux, Windows), C# with WPF, WCF, NHibernate and MySQL, and Java (Spring Boot, Kafka).

### Software Engineer · Antking 11/2014 – 02/2015

- Built a website for managing projects and distributing iOS and Android builds to customers for feedback (PHP with Laravel, HTML/CSS, AWS).

## TECHNICAL SKILLS

| | |
|---|---|
| **Mobile** | Swift, SwiftUI, UIKit, Objective-C, Kotlin, Java, Flutter, Dart |
| **Desktop, backend** | Cocoa (macOS), WPF, WCF (Windows), C#, .NET Core, ASP.NET, Entity Framework, C++ |
| **Data and cloud** | PostgreSQL, MS SQL, MySQL, SQLite, Azure, AWS, Supabase |
| **Practice** | Clean and Onion Architecture, MVVM, design patterns, Agile and Scrum, UML, unit, widget and integration testing |
| **AI (past year)** | Claude Code, GitHub Copilot, Speckit (spec-driven development) |
| **Working level** | React, HTML/CSS, JavaScript |

## PERSONAL PROJECT

### Finance: personal finance management app 07/2026 – Present

- Building it end to end (product, architecture, development): an offline-first app for iOS, Android and the web, in Vietnamese and English, using Flutter, Riverpod, Drift (SQLite) and Supabase.
- Spec-first workflow with Claude Code and Speckit: 33 feature specs, a versioned project constitution, about 41,000 lines of hand-written Dart and 1,900+ automated tests.
- Security chosen by device capability (biometrics, six-digit PIN fallback, inactivity lock) and reversible transaction history so every balance stays explainable.
- In active development. The source repository is private; a walkthrough is available on request.

## EDUCATION AND LANGUAGES

### Bachelor of Embedded Systems · FPT University 2015

**Languages:** Vietnamese (native), English (intermediate), Japanese (basic)
